

# Package: RcppDate (via r-universe)

October 21, 2024

**Type** Package

**Title** 'date' C++ Header Library for Date and Time Functionality

**Version** 0.0.4.1

**Date** 2024-10-14

**Description** A header-only C++ library is provided with support for dates, time zones, ISO weeks, Julian dates, and Islamic dates. 'date' offers extensive date and time functionality for the C++11, C++14 and C++17 standards and was written by Howard Hinnant and released under the MIT license. A slightly modified version has been accepted (along with 'tz.h') as part of C++20. This package regroups all header files from the upstream repository by Howard Hinnant so that other R packages can use them in their C++ code. At present, few of the types have explicit 'Rcpp' wrappers though these may be added as needed.

**License** GPL (>= 2)

**Suggests** Rcpp

**Description**

A header-only C++ library is provided with support for dates, time zones, ISO weeks, Julian dates, and Islamic dates. 'date' offers extensive date and time functionality for the C++11, C++14 and C++17 standards and was written by Howard Hinnant and released under the MIT license. A slightly modified version has been accepted (along with 'tz.h') as part of C++20. This package regroups all header files from the upstream repository by Howard Hinnant so that other R packages can use them in their C++ code. At present, few of the types have explicit 'Rcpp' wrappers though these may be added as needed.

**Package Content**

Index: This package was not yet installed at build time.

**Maintainer**

Dirk Eddelbuettel <edd@debian.org>

**Author(s)**

Dirk Eddelbuettel [aut, cre] (<<https://orcid.org/0000-0001-6419-907X>>), Howard Hinnant [aut]  
(author of 'date' library)

**Examples**

```
## see the source files in the examples/ directory of the package
## check for (optional, only in Suggests:) Rcpp, and ensure we are
## not on Windows as this runs up to the ten second time limit
if (requireNamespace("Rcpp", quietly=TRUE) && (.Platform$OS.type != "windows")) {
  Rcpp::sourceCpp(system.file("examples", "year_month_day.cpp", package="RcppDate"))
}
```
