---

curse	<i>Random cursing words/phrases</i>
-------	-------------------------------------

---

**Description**

This function prints cursing words on the screen. The user can choose between the original content or a 'polite' version.

**Usage**

```
curse(polite = FALSE)
```

**Arguments**

polite	Logical. If FALSE (default), returns the one of the original cursing phrases. If TRUE, the 'eff' word is blanked by three stars
--------	---

**Value**

A randomly sampled cursing word or phrase

**Examples**

```
curse(polite=TRUE)
```
