tellme-package	<i>Detect (and Report) Compile-Time Platform</i>
----------------	--

Description

Report compile-time per-platform switches in a named vector.

Package Content

Index: This package was not yet installed at build time.

Maintainer

Dirk Eddelbuettel <edd@debian.org>

Author(s)

Dirk Eddelbuettel [aut, cre]

everything	<i>everything</i>
------------	-------------------

Description

Call available functions

Usage

```
everything()
```

Value

Nothing, function invoked for side effects

flags	<i>flags</i>
-------	--------------

Description

Return named vector with flags from R

Usage

```
flags()
```

Value

A named vector

tellme	<i>tellme</i>
--------	---------------

Description

Store a number of different compile-time #define values and returns them in a named character vector.

Usage

```
tellme()
```

Value

A named logical vector.

versions	<i>versions</i>
----------	-----------------

Description

Store the C++ compilation standard and returns it in a named integer vector.

Usage

```
versions()
```

Value

A named integer vector.
