tl`example-package` *Concise Summary of What the Package Does*

Description

More about what it does (maybe more than one line).

Package Content

Index: This package was not yet installed at build time.

Maintainer

Dirk Eddelbuettel <edd@debian.org>

Author(s)

Dirk Eddelbuettel [aut, cre]

bar *Simple example function*

Description

The **tl** package provides a uniform interface to logging from both R and C++ using the same namespaced `tl::debug()` (and alike for differ logging verbs) interface. This package (and function) demonstrates it.

Usage

```
bar(s = "baz")
```

Arguments

s A character string, defaults to "baz"

Value

Nothing is returned as the function is invoked for its side-effect.
